

PARAGON PULSE

Success Story: February 2024

Paragon Saves the Day!

PROBLEM ↓

A machining customer had a CNC machine down from a failed spindle motor. The customer had previously been working with the OEM to buy new spindles. The customer reached out to the OEM but were facing a two month lead time causing extensive production downtime.

THE SOLUTION

After speaking with our local Account Manager and learning our capabilities on spindle motors, Paragon was able to have the unit repaired and back to the customer in two weeks. This meant minimal down time lost and a substantial cost savings compared to new.

SUCCESS MADE EASIER:

Do you have a spindle motor that has failed? The list below is some of the major brands that can be repaired. If you don't see the brand of yours below, do not worry! Reach out to your local Account Manager today and let us assist with your next Spindle Repair.
