

# PARAGON PULSE

Success Story: November 2023

## Save Your Company from Costly OEM Upgrades

### PROBLEM

The customer was having failures with their Xycom control panels on their plastic injection molding machines. The OEM is no longer supporting older machine controls and is only offering a retrofit with significant downtime and cost for each machine.

### THE SOLUTION

Paragon was able to remanufacture their Xycom panels and upgrade the hardware. This saved the customer an estimated \$45,000 per machine and helped avoid additional downtime. The customer was thrilled with the service we provided and cost savings for their company.

### SUCCESS MADE EASIER:

Paragon can refurbish and upgrade your obsolete and older generation operation panels and HMIs to help keep you running. Remanufactured controls can help you prevent excessive cost of OEM retrofits and replacements. Contact your local Account Manager to find out more about our capabilities and amazing service!
